## Our Catamarans:

- Have greater stability, better fuel economy, higher speeds, shallower drafts and a higher passenger volume than similarly sized mono-hulls. They are also beach-able.
- Feature cored fiberglass construction providing high strength combined with low maintenance. The one piece molded hull is hand laid stitch mat, with a balsa core, providing maximum strength and minimum weight. Additional laminates of glass are used in all contact and corner areas.
- Are U.S. Coast Guard certifiable at the new 185 pounds per person standard and built to exceed A.B.S. (American Bureau of Shipping) specifications.
- Have many available deck layouts which are adaptable to suit your particular needs.
- Come with numerous power options.

*Enclosed are specifications, standard equipment and optional equipment lists. Please feel free to call for further information or a formal proposal based on your requirements.*

*Thanks for your inquiry, and we look forward to hearing from you .*
